

# MACHINE MUNCHIES

KYLIE GEORGIAN

# STUDENTS!

**Aren't you tired of wasting meal points? Aren't you tired of reaching the end of the school year and having an abundance of points that you couldn't possibly use up? Why spend money on meal points that will go to waste, then spend more cash on vending machines?...**

## **VENDING MACHINES NOW:**

- **Use change and cash**
- **Doesn't always give you requested snack**
  - **Buttons are faulty**
- **Have a boxy and boring design**

## **THE POTENTIAL THEY COULD HAVE:**

- **Touch screen capabilities**
- **Voice activated features for visually impaired**
- **A snack pal to assist you with your needs**
  - **Uses school points for payment**
  - **Has a bright and inviting display**
    - **ID recognition**
  - **Handicap accessible**
    - **Allergy aware**

With ONLY an amount of \$110,000 We can Make  
that a reality!

For Webster University Students, We can Start  
out With a total of 6 Machines Spread  
throughout campus.

And after the Success of the First round, these  
Machines Will Spread throughout the US as the  
Main Source of Snacks For all Students!

# It's Not Just a Vending Machine, It's a MACHINE MUNCHIE

- **Touch screen features allow the keypad to appear at whatever height and/or level of the customer**
- **Keypad scans student ID in order to use school points for payment**
- **Interactive lava gel on sides of the vending machine bring a youthful and playful look, responding to the touch of the customer.**

Meet

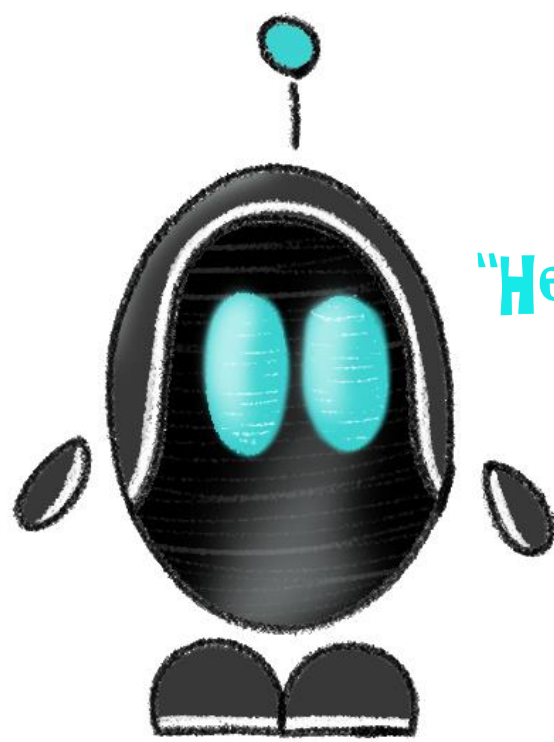

V.I.M

Vending MACHINE Intelligence

# VIM

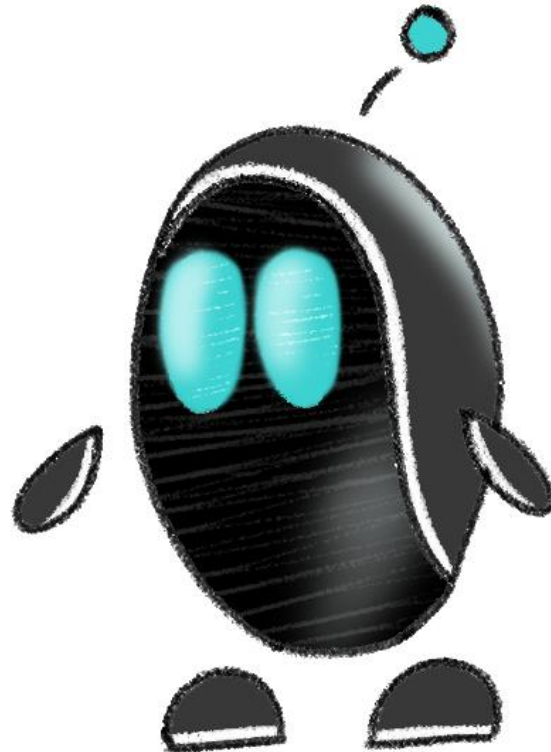

"HELLO! My name is VIM! What can I get you today?"

**This virtual assistant projects onto the main touch screen, fully prepared to help you get the snack of your dreams. By bouncing from row to row with a little spring in his step, VIM cheerfully helps the machine drop your snack.**

**Because of student ID recognition, VIM makes sure that you avoid all allergy sensitive foods that may be in school records.**

**"Careful munchie! That might be harmful to your peanut allergy!"**

**For those who are visually impaired, VIM will gladly describe the foods and drinks in the machine, and will listen to your response.**

# **WHY THE LAVA?**

**Besides it being a sleek feature to the design, it also provides tactile input for those sensory craving individuals. It can put any stress-ridden and anxiety-filled student to ease. With the simple touch of your hand, the lava reacts with bubbling features and vibrates in the palm of your hand.**

**Are these features essential for vending machines? Maybe not.  
Do vending machines work just fine just as they are? Maybe.**

**But we are the generation of the future. Technology is growing  
everyday! What better way to show the progression of  
universities, and advertise the success of schools of technology,  
then to add flare and shine to even the most simple of luxuries!**

**Join us in bringing VIM to reality, so that he might be able to  
subdue the munchie inside every sleep-deprived, driven student!  
#machinemunchies**
